

Application Web - Express

- Ajout d'express
 - npm i express
 - yarn add express
- Fichier d'entrée, server.js
 - Déclaration d'un serveur
 - Exposition d'une route
- Lancement
 - node server.js

```
const express = require('express')
const app = express()
const port = 3000

app.get('/', (req : Request<P, ResBody, ReqBody, ReqQuery, Locals> , res : Response<ResBody, Locals> ) => {
  res.send( body: 'Hello World!')
})

app.listen(port, hostname: () => {
  console.log(`Example app listening on port ${port}`)
})
```

```
[nodemon] restarting due to changes...
[nodemon] starting `node server.js`
Example app listening on port 3000
```

Express

- Servir des fichiers statiques

```
app.use('/%PATH%', express.static(root: 'dist'));  
app.use('/%PATH%', express.static(root: 'public'));
```

- Consommer ces fichiers
 - `http://localhost:3000/%PATH%/index.html` -> `./public/index.html`
 - `http://localhost:3000/%PATH%/index.min.js` -> `./dist/index.min.js`
