Etat et cycle de vie

```
class Welcome extends React.Component {
    constructor(props) {
        super(props);
        this.state = {date: new Date()}
    }

    render() {
        return <h1>Bonjour, {this.props.name}, il est {this.state.date.toLocaleTimeString()}</h1>;
    }
}
```

Etat et cycle de vie

```
componentDidMount() {
    this.timerID = setInterval(
        handler: () => this.tick(),
        timeout: 1000
    );
}

componentWillUnmount() {
    clearInterval(this.timerID);
}
```
