```java
@Repository
public interface PersonRepository extends CrudRepository<Person, UUID> {
    Iterable<? extends Person> findByEventId(UUID id);
}
```

- I CrudRepository
  - (m) save(S): S
  - (m) saveAll(Iterable<S>): Iterable<S>
  - (m) findById(ID): Optional<T>
  - (m) existsById(ID): boolean
  - (m) findAll(): Iterable<T>
  - (m) findAllById(Iterable<ID>): Iterable<T>
  - (m) count(): long
  - (m) deleteById(ID): void
  - (m) delete(T): void
  - (m) deleteAllById(Iterable<? extends ID>): void
  - (m) deleteAll(Iterable<? extends T>): void
  - (m) deleteAll(): void

Repository

- Composant d'accès à la base

- CrudRepository, méthode implicite

```java
@Repository
public interface PersonRepository extends CrudRepository<Person, UUID> {
    Iterable<? extends Person> findByEventId(UUID id);
}
```

CrudRepository
- save(S): S
- saveAll(Iterable<S>): Iterable<S>
- findById(ID): Optional<T>
- existsById(ID): boolean
- findAll(): Iterable<T>
- findAllById(Iterable<ID>): Iterable<T>
- count(): long
- deleteById(ID): void
- delete(T): void
- deleteAllById(Iterable<? extends ID>): void
- deleteAll(Iterable<? extends T>): void
- deleteAll(): void
